

KITCHEN STORY (Write Up)

Application name: Kitchen Story

Developed by: G Rajya Lakshmi Suvarna Himavalli

Sprints Planned:

Sprint 1:

- Create Github repository called KitchenStory
- Create the application with angular
- Create a “db.json” file for database
- Create admin and user dashboard

Sprint 2:

- Create component for users and food items
- Add food items and register users
- Design a User Interface for food items and search food by food name
- Show the cart to the user.
- Admin can change password if admin wants
